

## Introducing Dolphin: Your AI-powered Maritime Knowledge Assistant

### Smarter Maritime Decisions, Anytime, Anywhere

Mariner Skills is proud to launch **Dolphin AI**, our next-generation maritime knowledge assistant designed to support vessel masters, onboard crews, office managers, and training leaders.

Dolphin AI puts over 20 years of trusted training and reference material directly at your fingertips, powered by a conversational AI interface that delivers instant, tailored guidance—whether you are at sea or ashore.

- On-demand answers to regulatory, compliance, and safety questions
- Integration with key industry standards (SIRE, CDI, TMSA, STCW)
- Role- and task-based search across courses, videos, and case studies
- Smarter workflows that reduce delays and reinforce best practices
- Real-world case studies & learning modules for continuous growth

### Why It Matters

- Instant clarity for operational decisions
- Consistent compliance across teams
- Reduced risk & errors through just-in-time knowledge
- Empowered crews with smarter tools onboard and in the office

### TAKEAWAY FOR OUR CLIENTS

Dolphin transforms the way maritime professionals access and apply knowledge. Your team gets immediate, role-specific answers when they need them most. With on-demand guidance, decision-making becomes faster, smarter, and aligned with the challenges you face right now.

By integrating Dolphin into your daily operations, you're empowering crews and shore-based teams with smarter tools that **save time, improve consistency, and reinforce best practices.**
